

A t-SNE plot showing gene expression data. The x-axis is labeled 'tSNE1' and ranges from -1.5 to 1.0. The y-axis is unlabeled but ranges from -1.5 to 1.5. A legend in the top-left corner indicates that blue dots represent 'Mother Steroid: False' and orange dots represent 'Mother Steroid: True'. The plot shows several clusters of points. A large cluster of blue points is located in the lower-left quadrant (tSNE1 < -1.0, tSNE2 < -1.0). Another large cluster of blue points is in the lower-right quadrant (tSNE1 > -0.5, tSNE2 < -1.0). A cluster of blue points is in the upper-left quadrant (tSNE1 < -0.5, tSNE2 > 0.5). A cluster of blue points is in the upper-right quadrant (tSNE1 > 0.0, tSNE2 > 0.5). There are several orange points scattered throughout, with a notable cluster of orange points in the upper-right quadrant (tSNE1 > 0.5, tSNE2 > 0.5) and a few orange points in the lower-left and lower-right clusters.
