

A t-SNE plot showing the relationship between gene expression data (tSNE1) and premature detail. The x-axis is labeled 'tSNE1' and ranges from -1.6 to -0.2. The y-axis is labeled 'tSNE2' and ranges from -1.6 to 1.6. The plot displays a dense cluster of points on the left side, colored according to the 'Detail Premature' legend: Extremely PTB (blue), Late PTB (orange), Normal (green), and Very PTB (red). The points are distributed across the plot, with a notable outlier red point at the bottom right corner.
